

Antioquia Gold Cisneros Operations Update

CALGARY, ALBERTA - (July 2, 2020) - Antioquia Gold Inc. (“Antioquia Gold” or the “Corporation”) (TSX VENTURE: AGD) (OTC Pink: AGDXF) is pleased to provide a summary of June 2020 production results for its Cisneros mining operation, and announce the progress of other ongoing projects.

Production Summary and Operations Update:

During June 1,857 troy ounces of gold were produced at the Cisneros mining operation. An average of 475 tonnes per day were processed with a recovery of gold to concentrate of 96.5% during the month. As shown in the table below, an important increase in gold production has been reached.

		January	February	March	April	May	June
Mineral Processed	Dry Tonnes	14,349	8,936	12,081	13,329	11,077	14,262
Feed Grade	g/t Au	2.60	2.27	3.02	3.25	4.19	4.20
Gold Produced	Tr. Oz.	1,155	625	1,133	1,349	1,446	1,857
Total Recovery	%	96.4%	95.9%	96.5%	96.9%	97.0%	96.5%
Worked days	Days	31	29	31	30	31	30
Average Processed	Dry Tonnes/Day	463	308	390	444	357	475

Below are other important announcements associated with the current status of the operation:

- **Plant expansion 1,200 TPD:** Pre-commissioning and commissioning begin in mid-July as announced in the last press release. Initial tests for the second ball mill were carried out in June with satisfactory results.
- **Mine preparation status:** Several narrow vein stope blocks will be mined with the long hole stoping method beginning in July. These blocks will contribute to increased feed grade in the coming months.
- **Stockpile:** 14,970 tonnes grading 3.4 g/t Au is the average gold grade and balance of mineralized material at the end of June in surface stockpiles.

“The 27% growth in gold production in June, added to the coming increase in plant processing capacity, is highly satisfactory and encourages us to continue working towards solid growth of the company. This is a production record for our Company, which we expect to surpass very soon as we continue to ramp up our production and resources,” stated Mr. Gonzalo de Losada, president and CEO of Antioquia Gold.

Readers should be cautioned that the Corporation’s decision to move forward with the construction and production of the Cisneros Mine is not based on the results of any pre-feasibility study or feasibility study of mineral reserves demonstrating economic or technical viability. Readers are referred to the Cisneros Report for details on independently verified mineral resources on the Cisneros Project. Since 2013, the Corporation has undertaken exploration and development activities; and after taking into consideration various factors, including but not limited to: the exploration and development results to date, technical information developed internally, the availability of funding, the low starting costs as estimated internally by the Corporation’s management, the Corporation is of the view that the establishment of mineral reserves, the commissioning of a pre-feasibility study or feasibility study at this stage is not necessary, and that the most responsible utilization of the Corporation’s resources is to proceed with

the development and construction of the mine. Readers are cautioned that due to the lack of pre-feasibility study or feasibility study, there is increased uncertainty and higher risk of economic and technical failure associated with the Corporation's decision. In particular, there is additional risk that mineral grades will be lower than expected, the risk that construction or ongoing mining operations will be more difficult or more expensive than management expected. Production and economic variables may vary considerably, due to the absence of a detailed economic and technical analysis in accordance with NI 43-101. Project failure may materially adversely impact the Corporation's future profitability, its ability to repay existing loans, and its overall ability to continue as a going concern.

Qualified Persons

Roger Moss, Ph.D., P.Geo., Consultant to Antioquia Gold, is the qualified person as defined by National Instrument 43-101 and has reviewed and approved the technical information provided in this news release.

Reader Advisory Forward-Looking Statements:

This press release contains "forward-looking information" within the meaning of Canadian securities legislation. This information and these statements, referred to herein as "forward-looking statements", are made as of the date of this press release and the Corporation does not intend, and does not assume any obligation, to update these forward-looking statements, except as required by law.

Forward-looking statements relate to future events or future performance and reflect current expectations or beliefs regarding future events and include, but are not limited to, statements with respect to: the completion of the Rights Offering and the use of proceeds of the offering. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects", "anticipates", "plans", "projects", "estimates", "assumes", "intends", "strategy", "goals", "objectives", "schedule" or variations thereof or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be forward-looking statements.

Forward-looking statements are made based upon certain assumptions by the Corporation and other important factors that, if untrue, could cause the actual results, performances or achievements of Antioquia to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business prospects and strategies and the environment in which Antioquia will operate in the future, including the accuracy of any resource estimations, the price of gold, anticipated costs and Antioquia's ability to achieve its goals, anticipated financial performance, regulatory developments, development plans, exploration, development and mining activities and commitments. Although management considers its assumptions on such matters to be reasonable based on information currently available to it, they may prove to be incorrect. Additional risks are described in Antioquia's most recently filed Annual Information Form, annual and interim MD&A and other disclosure documents available under the Corporation's profile at: www.sedar.com.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that estimates, forecasts, projections and other forward-looking statements will not be achieved or

that assumptions do not reflect future experience. We caution readers not to place undue reliance on these forward-looking statements as a number of important risk factors could cause the actual outcomes to differ materially from the beliefs, plans, objectives, expectations, anticipations, estimates, assumptions and intentions expressed in such forward-looking statements.
